

COOL

Community Oriented Opportunities for Learning Education Project

Scientific Research (SR1) is a non-profit 501(c)(3) organization that strives to be a leader in eliminating disparities in education, health, and technology. We believe that all students should have the chance to reach their full potential. The cornerstone of SR1 COOL Education is one-on-one and small group tutoring and mentoring of students. Students will learn subject matter from SR1 staff and AmeriCorps members—all passionate and proficient in their area of study.

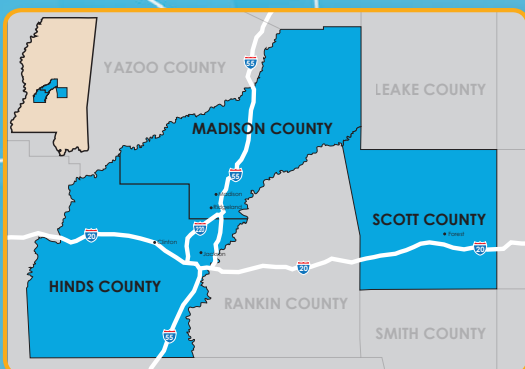

Independent evaluation has identified that SR1's COOL Education Project improves the academic and social skills of students, thus providing necessary skills for college access and success.

The COOL Education Project is a non-school hour based program designed to assist students in grades K-12 with developing 21st century skills necessary for academic success, character-building, and dropout prevention through innovative tutoring, mentoring, and enrichment activities.

The COOL Education Project gives students enhanced, comprehensive learning until they achieve college access and success. The COOL Education Project consists of non-school hour activities during the school year and summer recess. The project will foster the following:

- Non-School hour mentoring and tutoring opportunities
- Advanced hands-on STEM (Science, Technology, Engineering, & Mathematics) mentoring and tutoring
- Mentoring and tutoring in core subjects
- Instructional strategies to meet students' individual needs and learning styles
- Innovative skills development (critical thinking, communication, collaboration, creativity)
- 21st century life and career skills
- School and community collaboration
- Learning in a safe environment
- College and career preparation
- A respectful relationship between SR1 staff and the students and parents
- Enrichment recreational activities
- Family, social service, and health programs that engage parents

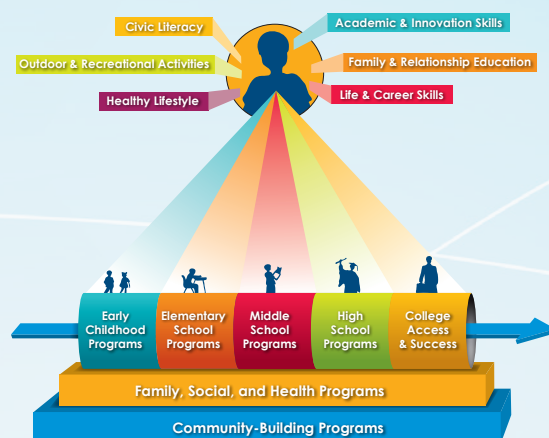

The success of the COOL Education Project is a direct result of the generous support from the community through time and donations.

Service Area

Our Proven Model of Success

Results show that students participating in the program had significant improvements academically and socially.
